SUMMARY

Frontend Developer with **3+ years of experience at Accenture**, building and enhancing enterprise dashboard applications using **ReactJS, JavaScript (ES6+), TypeScript, and SCSS**. Experienced in **developing reusable components, optimizing UI performance, and integrating REST APIs** within Java-based Agile environments. Recognized as a **Star Performer** for consistently delivering high-quality contributions. Passionate about building **clean, performant, and user-centric web interfaces**. Currently strengthening full-stack capabilities through self-directed projects in React and Java/Spring Boot, with immediate availability.

SKILLS

- **Front-End Development:** ReactJS, JavaScript(ES6+), Typescript, HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, REST API Integration
- **State Management & Libraries:** Redux Toolkit, Context API, Hooks, Axios
- **Backend:** Java, JDBC, Hibernate, Spring Boot
- **Databases:** MySQL, PostgreSQL, Oracle DB, SQL
- **Tools & Technologies:** Git, GitHub, VS Code, Chrome DevTools, Postman, Figma
- **Authentication & Security:** JSON Web Tokens (JWT)
- **Programming Languages:** Python, Shell Scripting (Bash)
- **AI Tools:** GitHub Copilot, Cursor, ChatGPT
- **Core Competencies:** Problem Solving, UI Performance Optimization, Component Architecture, Agile Delivery, Cross-functional Collaboration

EXPERIENCE

Accenture Pvt. Ltd., Kolkata - Application Development Analyst (June 2021 - September 2024)

- Built and maintained **15-20 reusable React components in TypeScript and JavaScript** for enterprise dashboards, improving UI consistency and reducing duplicate code across multiple modules
- Integrated **REST APIs using Axios** for dynamic data rendering across 5+ dashboard features, handling loading states, error boundaries, and response mapping
- Refactored legacy UI components and optimized rendering logic, achieving **15-20% improvement in page load performance**
- Implemented **responsive layouts** using Bootstrap, SCSS, and custom CSS, ensuring cross-browser compatibility across 3+ application modules
- Performed **API validation and data mapping** in coordination with Java-based backend services to ensure accurate and consistent data rendering on the UI
- Debugged UI issues using **Chrome DevTools**, reducing **QA-reported defects by 15%** across sprint cycles
- Implemented **form validation and error handling** across user-facing modules, **reducing input errors by 25-30%**
- Worked closely with **UX/design teams** to translate **Figma wireframes** into pixel-perfect React components, maintaining design consistency across modules
- Participated in **code reviews** and contributed to frontend coding standards, improving team-wide code quality and maintainability
- Collaborated with backend developers, QA, and product stakeholders in bi-weekly Agile release cycles, including sprint planning, standups, and deployments
- Awarded **Star Performer - February 2023** for consistent delivery and quality contributions

PROJECTS

- **[SmartNotes Manager \(ReactJS\)](#):** Developed a responsive notes management application with CRUD functionality, search, and filtering using ReactJS. Implemented localStorage for persistent data storage and built reusable components for improved usability and maintainability.

- [Recipe Genie \(ReactJS + OpenRouter AI Integration\)](#): Built an AI-powered recipe suggestion application using OpenRouter AI models that generates recipes based on user-provided ingredients. Implemented dynamic prompt generation, ingredient add/remove functionality, and retry search options, along with loading states and error handling.
- [Assembly Endgame \(ReactJS Game\)](#): Developed an interactive word-guessing game using ReactJS, Hooks, and conditional rendering. Incorporated custom hints, game rules modal, animations, and state-based gameplay logic for an engaging user experience.
- [Pokémon Finder \(JavaScript + API\)](#): Created a responsive web application using Vanilla JavaScript and the PokéAPI, implementing asynchronous API calls and dynamic DOM manipulation to enable real-time search.

EDUCATION

B.Tech in Computer Science and Engineering

GITAM Deemed to be University, Visakhapatnam, AP | CGPA: 9.02 (June 2017 - April 2021)

CERTIFICATIONS

- Google & Kaggle: 5 Day AI Agents Intensive Course
- HackerRank: Java, Python, JavaScript, SQL, CSS, React
- Coursera:
 - Johns Hopkins University: Programming for Everybody Python, HTML, CSS, and JavaScript for web developers
 - Frontend Web UI Frameworks and Tools: Bootstrap 4
- NPTEL, IIT KHARAGPUR: Database management system
